FASTER FIBER. BETTER BUSINESS.™

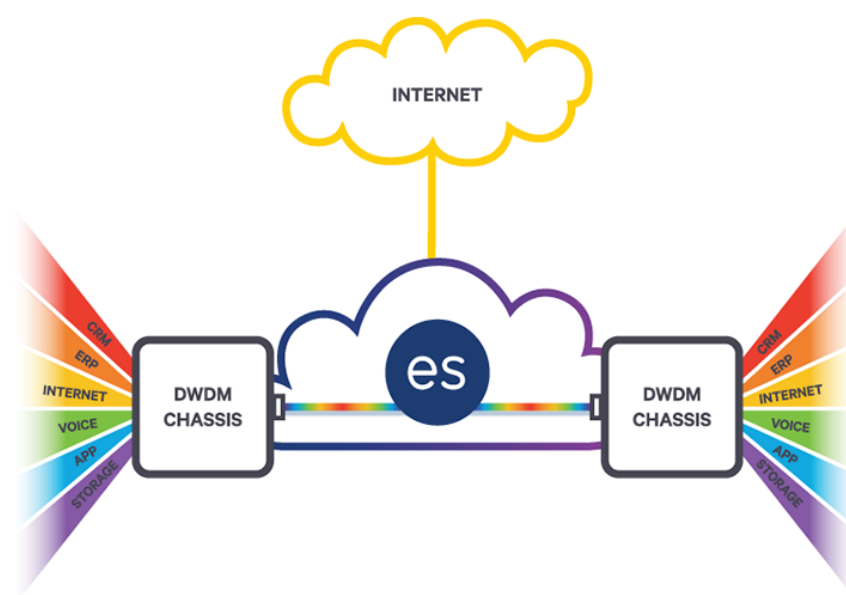

Partner News & Updates

Product Spotlight: D-DWDM

Dedicated Dense Wavelength Division Multiplexing, or **D-DWDM** as it is commonly known, is an optical, multiplexing technology used to increase bandwidth over existing fiber networks. It works by combining and transmitting multiple signals simultaneously at different wavelengths on a single fiber strand.

D-DWDM is really best used by businesses that transfer massive amounts of data and manage complex IT applications with a need for up-to-the-minute data replication.

Recently, Everstream provided a D-DWDM solution to a cloud data center provider. This customer is now able to offer its clients a turnkey solution of voice, dedicated internet access, disaster recovery, backup services, redundancy, diverse paths and more -- all from a local vendor and backed by a local fiber service provider.

Q3 On-Net Spiff

Our 2018 On-Net Spiff will continue through Q3!

Two opportunities to earn upfront commission:

- Sign a NEW customer logo to a **3-year contract** in a current Everstream On-Net Building, receive the **value of their MRC upfront!**
- Sign a customer to a **5-year contract** in a current Everstream On-Net Building, you get **2.5X the value of their MRC upfront!**

Agents will retain standard agreed-upon commission structure in addition to qualifying spiff upfront bonus.

Other restrictions apply, [click here for the most current spiff details.](#)

Don't forget about our online **Partner & Agent Portal!** Here you can easily find pertinent information and resources. You can also request an Everstream Partner Kit which includes printed versions of our sales literature and more. We are continuously updating the portal so check back often!

You can access the portal at any time at everstream.net/partner-portal.
